

# jf creativia

## Manual v 1.0

Joomla 2.5 & 3.0 template

# I. Installation

**1. Install template + modules + plugins**

Download template which is correct joomla version at here:

<http://www.joomfreak.com/free-downloads/free-templates/2014/jf-creativia/joomla/templates.html>

# II. Install Quickstart Version

**1. Download quickstart version**

<http://www.joomfreak.com/free-downloads/free-templates/2014/jf-creativia/joomla/quickstarts.html>

**2. Unzip quickstart to your local PC and upload to remote**

**3. In your browser type the url where you copied the quickstart files followed by „/installation“**

**4. Set configuration.php to chmod „777“ (set it back to 444 when installation is finished!)**

**5. Follow the installation instructions and check the folder permissions**

**6. Insert your site database info and restore quickstart sql backup**

**7. Insert your site title, personal information email etc.**

**8. Insert your administrator username, password & email**

**9. Finish installation and remove „installation“ directory**

**10. You are done => you can now call the site url**

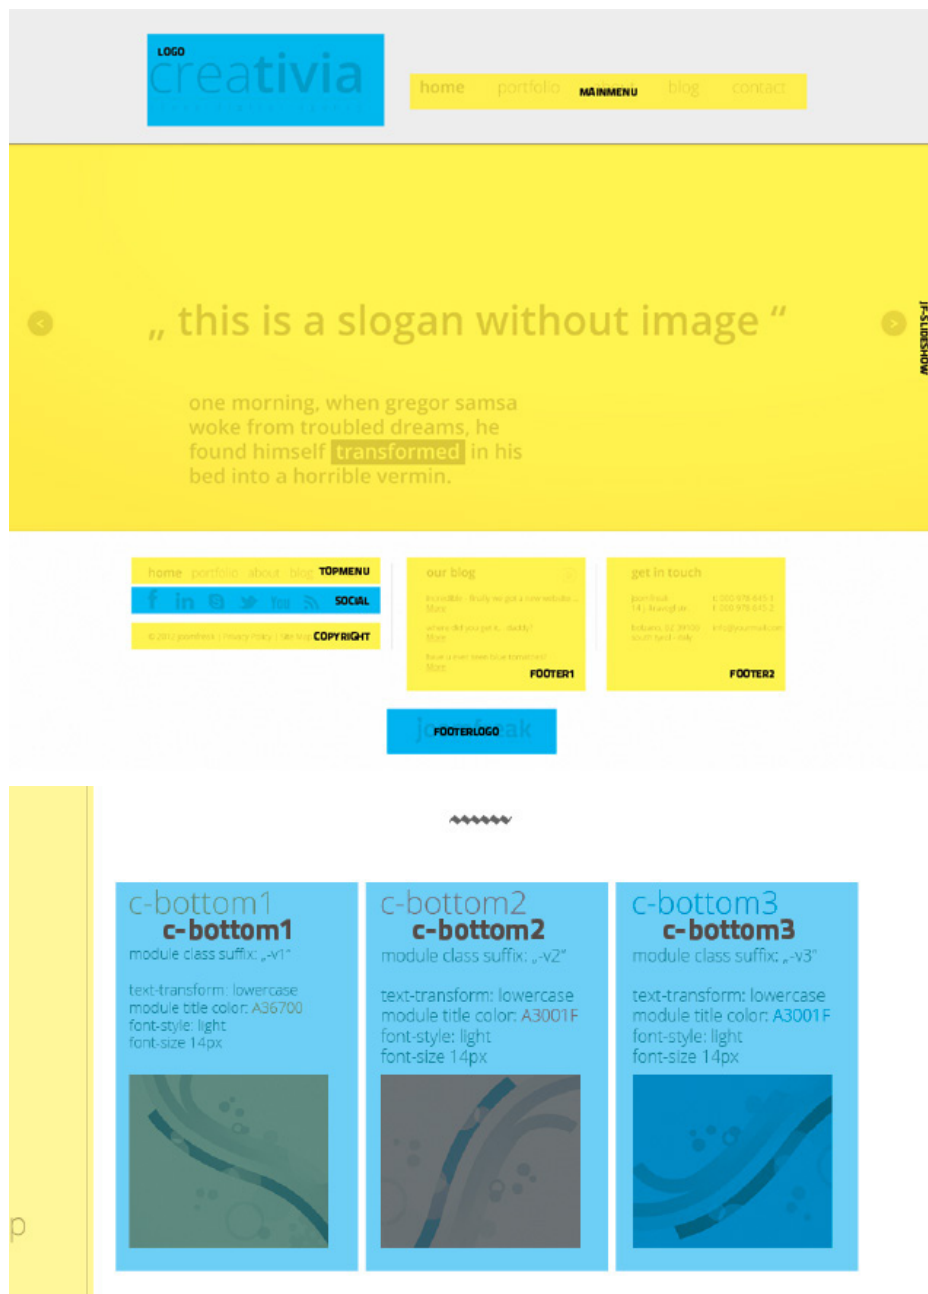

## III. Configuring
